RAPID RESPONSE TEAM COORDINATES APPROVAL FOR CORONAVIRUS TREATMENT

Emory's first coronavirus patient began receiving infusion therapy as a result of Georgia CTSA's assistance in coordinating the approvals needed within 48 hours.

GEORGIA CTSA INVESTIGATORS ENCOURAGED BY COVID-19 VACCINE TRIAL

Georgia CTSA investigators Evan Anderson, MD, and Nadine Rouphael, MD, co-authored results published in NEJM reporting a robust anti-SARS-CoV-2 immune response during the investigational mRNA-1273 vaccine phase 1 trial. Phase 3 trial is now underway.

GEORGIA CTSA LEADS SEROSURVEY FOR CDC AND FEMA COVID-19 RESPONDERS

Georgia CTSA and Emory University including the Emory Medical Laboratory assisted the CDC and FEMA in conducting a serosurvey to assess the presence of antibodies to SARS-CoV-2 among their workforce who are participating in the COVID-19 response.

Collaboration and Team Science

After a resource is selected from the Homepage, detailed sidebar navigation is available on the interior page

The goal of Collaboration & Multi-Disciplinary Team Science is to promote collaboration and team science among investigators at all four Georgia CTSA institutions and beyond.

[Collaboration and Team Science Brochure](#)

To reach this goal the Collaboration & Multi-Disciplinary Team Science team creates and collates collaboration and networking opportunities, provides team science training, organizes mentoring activities and enhances the recognition of team science with events such as:

[Southeast Regional Clinical & Translational Science Conference](#)

The annual conference brings together researchers from across the region to present the best
